SUPERIOR BEAM HANDLERS

Superior Engineering beam handlers help you safely move beams or journals from one location to another, regardless of whether the beam or journal is empty or loaded. Our beam handler eliminates the dangers involved in moving beams or journals using conventional forks by offering handlers offer a saddle in which the ends of the beam can sit. This saddle anchors the beam in place, eliminating the possibility of rolling or other movement that could result in significant damage or injury.

**FORK or ITA MOUNTED
STEEL CONSTRUCTION
OSHA AND ANSI/ASME COMPLIANT
AMERICAN MADE
SAFELY STORES, RETRIEVES AND CARRIES BEAMS OR JOURNALS**
